Trace Detection  
Presumptive Drug Identification  
Officer Safety

Probable Cause Assessment  
Narcotics Investigation  
Fentanyl

**MX908** by 908 Devices is a powerful **handheld mass spectrometer** designed for rapid, on-site detection and identification of narcotics at trace levels. Utilizing advanced high-pressure mass spectrometry (HPMS), the MX908 delivers exceptional selectivity and sensitivity, **identifying priority drugs** like fentanyl, xylazine, methamphetamine, cocaine, heroin, and emerging substances such as cathinones and cannabinoids. Ideal for law enforcement, border security, and correctional facilities, it provides **actionable intelligence** in real time, enhancing **officer safety** and supporting investigations by establishing probable cause. As drug trends evolve, including threats like nitazenes, MX908's continuously updated target list ensures users **stay ahead of emerging dangers**. Rugged and reliable, MX908 is an indispensable tool for clandestine lab remediation, border checkpoint operations, and hazmat responses, making it essential for **modern drug detection and public safety**.

# Open-source visual data intelligence platform

Founded by experts in the data intelligence space, US based FirstTwo provides location-based visual intelligence to over 2,500 public safety agencies across the United States. Officers can visualize information in real-time on a map from any device. FirstTwo's goal and mission is to make its customers safer and smarter by arming them with intelligence in the field or in the office. FirstTwo is a perfect tool for patrol, investigations, tactical, RTCs, dispatch, fire and many other departments in an agency. FirstTwo works out of the box for any agency in the United States without setup or download. Try it today for free. To learn more, visit [FirstTwo.com](http://FirstTwo.com).

**Fentanyl Disposal  
Narcotics Disposal  
Eliminates Incinerators**

**Eliminates Drug Diversion  
On-Site Drug Destruction  
Non-Retrieveable**

NarcX Solutions Inc. is the only independently validated method of "on-site" destruction in the United States that is in accordance with the Drug Enforcement Administration's strict definition of "Non-Retrieveable." As soon as illicit fentanyl pills and powder, methamphetamine, heroin, cocaine, THC, CBD, oxycodone, etc. are placed into NarcX™'s patented liquid solution they are rendered immediately non-divertible and ultimately "Non-Retrieveable." NarcX™ eliminates the need to store these seized drugs at a law enforcement facility until they can be driven to an EPA approved incinerator. NarcX™ has been independently validated to prove its environmentally friendly and can be disposed of in a common landfill. NarcX™ prioritizes "officer safety" and is ideal for any law enforcement agency. NarcX™ eliminates the challenges that officers and evidence managers routinely encounter. NarcX™ is partnered with the leading biohazard remediation company in the United States. We provide a white-glove service that shows up at your law enforcement facility, inventories your seized evidence manifest, and shreds and disposes of the drugs into NarcX™.

Skydio stands at the forefront of American drone innovation as the nation's leading manufacturer and global pioneer in autonomous flight technology. Through advanced AI and computer vision, Skydio has dramatically transformed how law enforcement agencies keep their officers and communities safe with Drone as First Responder (DFR) programs.

These autonomous drones serve as force multipliers for public safety agencies, providing real-time situational awareness during critical incidents, natural disasters, and emergency response. Skydio's DFR platform combines unprecedented reliability with AI-powered precision navigation, allowing drones to operate safely in complex environments, day or night while delivering crucial aerial intelligence to decision-makers on the ground.

Headquartered in California, Skydio upholds the highest security standards with all products designed, assembled, and supported in America. Today, 700+ public safety agencies rely on Skydio to improve officer safety, reduce response times, and protect their communities.

WAVE Digital Assets (WAVE) is a trusted SEC-registered investment advisory firm specializing in digital assets, with over six years of experience managing and deploying more than \$2 billion in crypto assets. WAVE has established itself as a leader in navigating the complexities of the digital asset ecosystem. Operating in a fiduciary role, WAVE underscores trust and accountability in all aspects of its services.

WAVE Government Practice bridges a deep understanding of government operations with private-sector innovation. The firm provides critical training to law enforcement agencies, equipping investigators to understand how digital assets operate and are exploited in criminal activities. Furthermore, WAVE is equipped to advise agencies on preserving the value of seized digital assets during the volatile pre-forfeiture phase, offering tailored strategies to secure maximum value upon liquidation. This unique combination of expertise and fiduciary responsibility makes WAVE a reliable and trustworthy partner in this dynamic and rapidly evolving field.
